

ColorCert ScoreCard Server

Communicate Your Color. Your Way.

ColorCert Scorecard Server is designed for Consumer Packaged Goods Brands who need an at-a-glance view of production quality across their print and packaging supply chain. Redesigned from the ground up, the ColorCert Scorecard Server will help you save time and money by leveraging a consolidated, web-based, customizable dashboard to communicate color performance. Most importantly, implementing ColorCert Scorecard Server helps communicate quality in a single-number score that is relevant and easy to understand.

Greater Visibility

Gain visibility to color performance across your print and packaging suppliers for all pack-types:

- Monitor brand equity colors throughout your supply chain.
- See print quality results as print runs are completed.
- Consolidated view of multiple suppliers on a single scorecard system.

Unbiased Quality Management & Sustainability

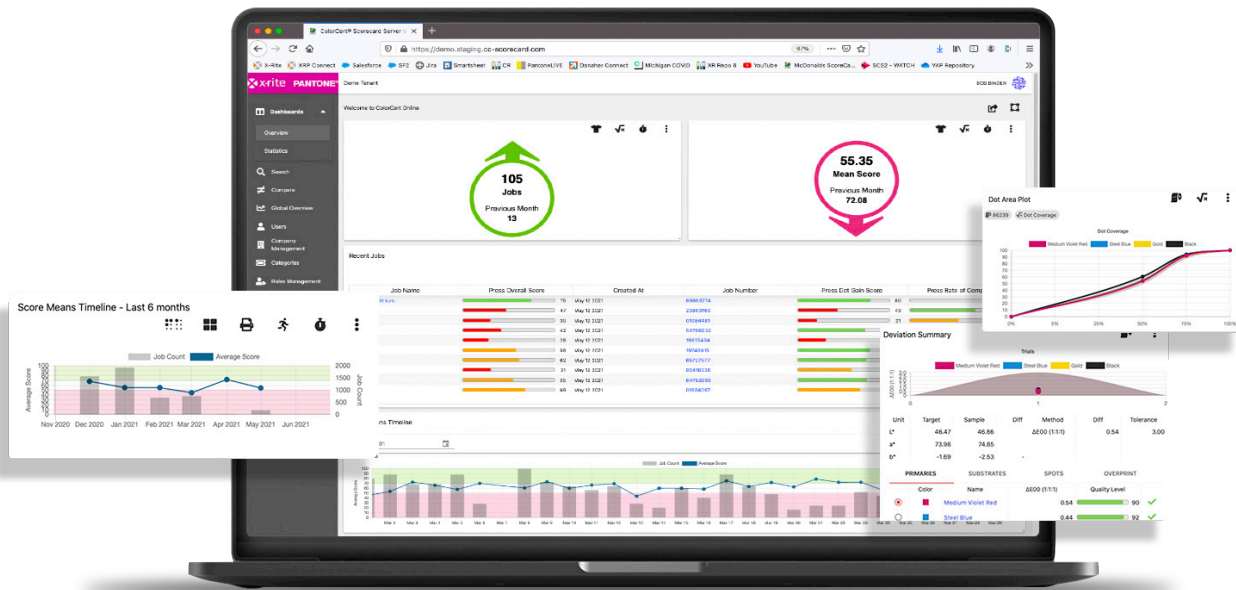

- Ensure quality requirements are being met by suppliers sooner in the process.
- Compare color quality between print and packaging component runs.
- Reduce proofing cycles, shipping, and on-site travel.

Configurable Dashboards and Reports

- View data in one, consolidated, customizable, web-based system.
- Tailor reporting to include information that is most valuable to your business and decision-making.
- Segment and review color performance by brand or pack-type.
- Analyze relevant data over time and supplier locations to uncover trends and unlock insights.

ColorCert ScoreCard Server Brand Solutions

ColorCert Scorecard Server enables you to:

See what is happening across your packaging print supply chain as it happens.

Take control of color performance and drive improvement.

Act on production data to make informed decisions.

More from the X-Rite Toolkit

ColorCert Repository

The ColorCert Repository Server is a secure, cloud-based portal to manage and deploy digital assets based on user type, location, brand, workflow stage, or other parameters.

ColorCert QA

ColorCert QA is a pressroom and ink room quality assurance solution that provides actionable guidance to manage color standards, improving color performance and reducing make ready time and waste.

ColorCert Desktop Tools

ColorCert Desktop Tools are modular solutions to create accurate color specifications and control processes at multiple points throughout the packaging workflow.

PantoneLIVE

With PantoneLIVE Production, leverage pure spectral values for spot colors throughout the production process to ensure accurate and repeatable color regardless of substrate, printing technology or ink types used.

Brand Color Services
